Configuring SMTP in IIS 5

Follow these steps to configure your IIS to send e-mails to all the ".com" domains on the Internet.

- 1. Go to Internet Service Manager→Default SMTP server→Domains.
- 2. Highlight the Domains.
- 3. Right click over it and then select the new domain to create a new remote domain.

New SMTP Domain Wizar	d			×
	Welcome to the Use this wizard virtual server. Specify the dom Remote	New SMTP Dom to create a new (ain Type:	ain Wizard	ЭМТР
	<1	Back Ne	ext >	Cancel

4. To deliver the mails to all the .com domains, enter *.com in the remote domain name.

New SMTP Domain Wizar				×
	ielect Domain Name What is the address spac by this domain? (For exan Name: *.com	e of mail that is to nple *.net, microso	be delivered (t.com)	
				_
	< Back	Finish	Cancel	

Note: Instead of delivering mails to all the .com domains, you can specifically define a particular domain name here to deliver mails to only this domain like abc.com instead of *.com.

5. Select the option "Allow incoming mails to be relayed to this domain ".

*.com Properties	? ×
General Advanced	
*.com	
Select the appropriate settings for your remote domain.	
Allow incoming mail to be relayed to this domain	
Send HELO instead of EHLO	
Outbound Security	
Route domain	
Use DNS to route to this domain	
C Forward all mail to smart host	
OK Cancel Apply	Help

- 6. Apply the settings as shown above and close this window.
- 7. The simplest configuration for remote email delivery for all .com domains with **anonymous authentication** has been set.

Here are the steps to check you SMTP server configuration.

- 1. Launch Outlook Express.
- 2. Go to tools \rightarrow Account \rightarrow Add and then add a new mail account.

Internet Accour	nts -		<u>?</u> ×	
All Mail	News Directory Service		Add	Mail
Account	Туре	Connection	Remove	News Directory Service
- Revention of the second seco	al mail (default)	Any Available Any Available	 Properties	
		-	Set as Default	
			Import	
			Export	
			Set Order	
			Close	

3. During the account creation wizard, in the outgoing mail server address box, enter the name or IP address of your above configured server.

Internet Connection Wizard		×
E-mail Server Names		N.C.
My incoming mail server is a POP3 💽 server.		
Incoming mail (POP3, IMAP or HTTP) server:		
mail.certsbraindumps.com		
An SMTP server is the server that is used for your outgoing e-mail Outgoing mail (SMTP) server:		
Server		
< Back	Next >	Cancel

4. Complete your wizard.

As a last confirmation, compose an e-mail in your outlook express, and send it to your any .com mail address like hotmail.com or yahoo.com.
